Local Representative
General Information

Brief History of the Faculty of Health Sciences

The Faculty of Health Sciences was founded in 1975 with the aim of training highly accomplished, skilled, committed and open minded professionals for Hungarian health care. This was the first school in Hungary that trained dietitians, health visitors, physiotherapists, public health and epidemiology inspectors, vocational teachers and ambulance officers.

During the past years both the structure and the curriculum have undergone changes in the spirit of modernization. As a result, there are at present 13 departments, about 200 highly-qualified lecturers and more than 3000 students.

It was an important event in the life of the Faculty that it became an integrated part of the famous and well-known Semmelweis University in 2000.

The latest development was the introduction of courses for international students in English. In the 2004/2005 academic year students of Physiotherapy could start their studies in English. In 2011 the English language Nursing and Midwifery B.Sc. programs were launched. From 2012 Nursing M.Sc. program is planned to be launched.

Facts and Figures

The Faculty of Health Sciences celebrated its 30th anniversary in 2005. During the past years 15 programs have been established. In the past 35 years more than 20,000 students graduated from the Faculty. Today about 3000 students are studying at this institution. The Faculty is very proud of its Library with more than 50,000 volumes.

During the last three decades the Faculty has developed extensive international relations, and as a result we have connections and cooperation with about 100 higher educational institutions throughout Europe, Asia and America. In the last six years more than one hundred students and dozens of staff members took part in long-term exchanges in the framework of the Socrates/Erasmus program. In the last couple of years we built up excellent relations with Nazareth College of Rochester (NAZ), USA, and as a result more than 100 students and staff members took part in a four-week summer training at NAZ in the last six years. Moreover, this relationship developed into the world’s first EU-US dual degree training in B.Sc. Nursing in 2007, in the frame of which both European and American student and teacher exchanges take place. The Faculty’s Asian relations have also been largely extended by establishing a fruitful relationship with Shanghai Jiao Tong University School of Medicine (SJTU) and Heilongjiang University of Chinese Medicine (HLJUCM) in China, and Nguyen Tat Thanh College (NTT) in Vietnam. Consequently, HLJUCM launched their B.Sc. Traditional Chinese Medicine training at our Faculty in 2010, and we are preparing cooperation with NTT about establishing our B.Sc. Nursing training in the near future. We are also proud of having operated our B.Sc. Physiotherapy training in Lugano, Switzerland for more than three years now.

International and Hungarian Accreditation

From 2004 – with Hungary becoming a member state of the EU – all diplomas of the Faculty are accepted by any member states of the EU with supplementary exams if needed, and what is more, our graduates can also work in the United States and Canada after they have acquired sufficient proficiency of English and passed supplementary exams if needed.
Campus

The Faculty of Health Sciences has several buildings in Budapest. The newly reconstructed main building is situated in the heart of the Hungarian capital. Work on the building was completed at the beginning of 2004, and in January all the educational and organizational units, which had been scattered in different places before, moved to one common building in the inner city area.

The former headquarters of the Faculty became the center for adult and postgraduate training.

The Faculty has two Residence Halls with a total capacity of about 200 students:
- id. János Bókay Residence Hall
  Address: H-1046 Budapest, 26 Erkel Gyula str.
  Phone: +36 1 369-1741
- Gábor Kátay Residence Hall
  Address: H-1131 Budapest, 44 Hajdú str.
  Phone: +36 1 349-7115

The Residence Halls are operated by the Residence Hall Committee, with members elected by students.

Computers

The Faculty provides students with the latest and best appliances of computer technology. Students can get information about all educational issues via the Internet and other computer based networks.

In the buildings and dormitories of the Faculty there are about 80 computers available for students to conduct research work and study during the opening hours of the buildings. Students can connect to the Internet by WIFI in the Hall and in the Library.

Statement of Non-Discrimination

The Faculty of Health Sciences, Semmelweis University, Budapest does not discriminate on the basis of race, color, national or ethnic origin, religion, sex, marital status, age or handicap.

Student Life

Foundation of the Student Union

The foundation was established by the students in 1991 with the mission of developing education and international relationships.

Aims and results:
- to aid students in travelling to international conferences and scholarships
- to organize field trips
- to operate the Student Centers located in the Residence Halls
- to operate the computer network with Internet access as well as multimedia and software
- to operate the microscopes accessible to students for study and research purposes
- to buy DVDs, CD-ROMs and books for students’ use in the Student Centers
- to organize professional elective courses.

Sport

The governing body for all student sports at the Faculty of Health Sciences is the Students Sports Union together with the Department of Physical Education. The 8 clubs affiliated with the Sports Union cover a broad range of sporting activities: basketball, handball, soccer, volleyball, swimming, body-building, aerobics and skiing included.
Programs in English

Physiotherapy B.Sc. Program
Physiotherapists are independent practitioners as members of health care teams working in prevention, health promotion and rehabilitation. Physiotherapy education at Semmelweis University Faculty of Health Sciences prepares students to be autonomous practitioners who can perform functional examinations, identify impairments, functional limitations, abilities and disabilities by using clinical decision making process. They can plan, explain, carry out, and adapt an examination based treatment, draw conclusions from the examination as a whole and rank the main problems according to the priority.

In treatment, physiotherapists can work with the patients independently to define shared goals for the treatment, decide on, explain and use relevant methods of treatment, evaluate the effect of the physiotherapy treatment in relation to the set goals, adapt and modify the method of the treatment to suit the individual patients, evaluate and modify manual skills, work out an account of the patient prognosis, document examination findings and treatment processes correctly, communicate with other health care professionals.

The program combines theory and practice in order to support students to integrate theoretical knowledge into practice.

Length of studies: 8 semesters, 240 credits
Degree: B.Sc.

Entrance requirements: applicants must successfully complete a language test in English and conduct a personal interview

Major Curricular Components: Social and Behavioral Sciences, Basic Sciences (Anatomy, Physiology and Pathophysiology), Basic Professional Sciences (Functional Analysis of Musculoskeletal System, Biomechanics), Physiotherapy Methods (Manual Techniques, Electrotherapy, Therapeutic Exercise, Training Methodology), Clinical Sciences and Applied Physiotherapy (Cardiorespiratory, Musculoskeletal and Neurological Physiotherapy), Physiotherapy for Specific Populations (Pediatrics, Elderly Care, Women Health, Critical Care), Clinical Practice in Different Fields of Health Care.

Career Opportunities: Hospitals, Clinics, Outpatient Clinics, Rehabilitation Centers, Adult Care Institutions, Primary Care, Home-Based Care, Schools, Hospice Care, Workplace Health Centers, Medical Tourism (Wellness Hotels, Thermal Baths, Spas), NGO Regional Community Wellness Programs, Sports Centers, Professional Sport Teams. After completing this program students can go on with their studies to the M.Sc. Program.

Nursing B.Sc. Program
Nurses are professionals who can individually organize, manage and supervise the whole process of nursing in every area of health care. Nurses holding a B.Sc. degree can organize, manage and supervise all their internal medical, surgical, obstetric-gynecological, psychiatric, intensive nursing and primary care tasks in every area of health care. They are responsible for conducting the healing-nursing activity prescribed by the physicians, and help the patient and the physician in performing certain examinations.

Length of studies: 8 semesters, 240 credits
Degree: B.Sc.

Entrance requirements: applicants must successfully complete a language test in English, and conduct a personal interview.

Career Opportunities: Primary Care, Specialized Care (Hospitals, Clinics, Nursing Homes, Hospice Care).
**Nursing M.Sc. Program**

In this M.Sc. program you will be able to gain multi-disciplinary skills to work in any of the national and international health systems, the mid- and higher level system of institutions of nursing.

**Length of studies:** 3 semesters, 90 credits  
**Degree:** M.Sc.

**Entrance requirements:** applicants must successfully complete a language test in English, and conduct a personal interview.

**Career opportunities:** After graduation you will possess the ability to participate in solving the scientific problems of nursing, to facilitate the development and practical application of the latest nursing experiences, to facilitate the management of nursing. Graduates from the program are entitled to continue their studies in Ph.D. trainings.

**Midwifery B.Sc. Program**

Midwives are professionals who are qualified to conduct their work in the obstetrics-gynecology areas independently and carry the attached responsibility, while cooperating with other members of the staff in perinatal monitoring to assist in deliveries and provide neonatal care.

**Length of studies:** 8 semesters, 240 credits  
**Degree:** B.Sc.

**Entrance requirements:** applicants must successfully complete a language test in English, and conduct a personal interview.

**Career Opportunities:** Hospital Neonatal Department, Outpatient Department, Obstetrics-Gynecology Clinic, Perinatal Advisory Service, Family Planning.

---

**Information about the B.Sc., M.Sc. and Ph.D. Programs**

Hungary, as a member of the European Union, belongs to the unified European Higher Education Area, which in principal follows the British and American three-cycle (bachelor, master and doctorate) training system.

In order to meet the objectives set out in the Bologna Declaration, Semmelweis University Faculty of Health Sciences has restructured its training system. Programs leading to a Bachelor’s Degree are based on a one-year core curriculum, followed by three years of study in specialist programs (major).

B.Sc. programs require the completion of 180 to 240 ECTS credits and can only be launched if there is a subsequent Master’s program. There is a possibility for students to proceed to graduate programs in inter- or intra-institutional forms.

M.Sc. programs require the completion of 90 to 120 ECTS credits.
The qualifications are comparable and recognised all around Europe. In this system it is much easier for students, lecturers and researchers to travel and build international relations, moreover, as citizens of the European Union they can continue their studies and plan their future as employees or entrepreneurs in each member state.

The training experience of 30 years and the valuable assets of the Faculty of Health Sciences have been incorporated in the new system. Qualifications are defined in terms of learning outcomes and not the length of years.

**Degree Programs**

**B.Sc. Programs**

1. **Specialty:** Nursing and Patient Care  
   Specialized programs for:  
   - Physiotherapist (also in English)  
   - Nurse (also in English)  
   - Midwife (also in English)  
   - Dietitian (also in English)  
   - Paramedic

2. **Specialty:** Health Care and Disease Prevention  
   Specialized programs for:  
   - Health Visitor  
   - Public Health Care Inspector

3. **Specialty:** Medical Laboratorial Diagnostic Imaging Analysis  
   Specialized programs for:  
   - Optometrist (also in English)  
   - Medical Diagnostic Analyst

**M.Sc. Programs**

1. **Specialty:** Nursing and Patient Care  
   Specialized programs for:  
   - Physiotherapist (also in English)  
   - Nurse (also in English)

2. **Specialty:** Nutritional Sciences  
   Specialized programs for:  
   - Nutritionist

**Ph.D. Programs**

**Program:** Semmelweis University, Pathological Sciences Ph.D. School, Program No. 8.6  
**Research Program:** Researches in Health Sciences  
**Head of program subdivision:** Prof. István SZA-BOLCS, M.D., Ph.D., D.Sc. – Vice Dean of Scientific Affairs of Semmelweis University Faculty of Health Sciences, Head of the Department of Dietetics and Nutrition Sciences

**Specialty Program:** Research in project planning, methodology and effect analysis in health education and nursing

**Doctoral program goals:** This program provides high level research possibilities for Ph.D. students in the broad field of Health Sciences.

   It is characteristic of Health Sciences to apply interdisciplinary approach, incorporating Genetics, Epidemiology, Biostatistics, Nutrition Science, Behavioural Sciences and Health Care Economics as well as largely borrowing methods of Social Sciences.

**List of program topics:**

1. Health Promotion, Prevention, Nursing, Quality of Life  
2. Researches on Public Health  
3. Researches on Nursing  
4. Researches on Nutrition Science  
5. Professional Devotion, Social Position in Health Care  
6. Health Education  
7. Research on Training in Health Care

**Entrance requirements:**

- Master degree  
- completed registration form (download here: http://phd.sote.hu)
Application and Admission Requirements

General Requirements
The Faculty of Health Sciences seeks students with appropriate academic qualifications, good command of English, and strong motivation to study and practice health care professions. Letters of recommendation are welcomed.

Application Requirements
Application Forms and all supporting documents have to be presented until April 30 to the officially appointed Semmelweis representative in the applicant’s country (see the list of Representatives at http://www.studyhungary.hu), or to College International Budapest (H-1406 Budapest 76, P.O. Box 51, Hungary), or directly to Semmelweis University Faculty of Health Sciences (H-1088 Budapest, Vas u. 17., Hungary; to the ‘International Students Secretariat’).

Documents to submit for B.Sc. studies
1. Completed Application Form
2. Payment Certificate about:
   - application fee of EUR 200 (non refundable) payable to the local representative. If there is no local representative, please transfer the fee to the bank account of IS International Studies.
   - test fee (non refundable) EUR 250 if the test is taken in Budapest.
3. Secondary School Leaving Certificate from an accredited secondary school. This document is a necessary prerequisite of starting the studies.
4. Medical Certificates (in English):
   - proving physical and mental capability of the applicant issued by a general practitioner,
   - a negative HIV test result (not older than one year),
   - a Hepatitis B vaccination certificate (examination is not enough, immunization must be proved by certifying the complete vaccination series),
   - a chest X-ray result (not older than one year).
5. Signed Photographs. Five passport size photos – please indicate your name on the back of them.
6. Curriculum Vitae in English
7. Copy of Passport/ID card with the applicant’s personal data and the expiry date of the passport/ID card.
8. Letters of Recommendation. Letters in English from a secondary school principal or science instructor are welcomed, but not obligatory.

Please note that the Faculty accepts only:
   - the original English document OR
   - the attested copy of the original English document OR
   - the authorized English translation of the original non-English document.

Documents to submit for M.Sc. studies
1. Completed Application Form
2. Payment Certificate about:
   - application fee of EUR 200 (non refundable) payable to the local representative. If there is no local representative, please transfer the fee to the bank account of IS International Studies.
   - test fee (non refundable) EUR 250 if the test is taken in Budapest.
3. B.Sc. Diploma
4. Medical certificates (in English):
   - proving physical and mental capability of the applicant issued by a general practitioner,
   - a negative HIV test result (not older than one year),
   - a Hepatitis B vaccination certificate (examination is not enough, immunization must be proved by certifying the complete vaccination series),
   - a chest X-ray result (not older than one year).
5. Signed Photographs. Five passport size photos – please indicate your name on the back of them.
6. Curriculum Vitae in English.
7. Copy of Passport/ID card with the applicant’s personal data and the expiry date of the passport/ID card.
8. **Letters of Recommendation**: Letters in English from university/college teachers are welcomed, but not obligatory.

**Please note that the Faculty accepts only:**
- the original English document OR
- the attested copy of the original English document OR
- the authorized English translation of the original non-English document.

**Aptitude Test**

**Date of Aptitude Tests**
Aptitude tests are held continuously either in Budapest or in several countries of the world (please see http://www.studyhungary.hu). Applicants will be informed about the place and date of the aptitude test by the Faculty or the official representative.

**Evaluation**
The evaluation of the aptitude tests will be performed by the Faculty Board. Applicants will be notified about the results within three weeks after the tests.

**Student Visa**
The accepted non-EU students have to apply for a **student visa**. The requirements will be listed in the Acceptance Letter issued by the Faculty of Health Sciences.

The visa application form can be downloaded from http://www.bmbah.hu

Students coming from EU and EEA countries **do not need a student visa**, but have to show up for registration at the Office of Immigration and Nationality within 90 days after their arrival in Hungary.

**Fees and Costs**

**Tuition Fee and Additional Charges**
The yearly tuition fee is to be paid in 2 installments by semesters by the deadlines given below, unless the Hungarian Visa regulations prescribe different conditions.

**Test Fee in Budapest:** EUR 250
(if the test takes place outside Hungary the official university Representative will inform you about the sum of the test fee – EUR 250 + additional fee)

**Registration Fee:** EUR 200
(payable together with the tuition fee)

Please note that payment is fulfilled when the money arrives on the below account. Please note that bank transfer can take 3–5 workdays.
Payment Details

Payments can be made by bank transfer in EUR to the bank account of the university program or by cash payment personally in any MKB Bank (www.mkb.hu) branch office:

Account name: IS International Studies
Account (IBAN) Number: HU22 1030 0002 1047 6764 4882 0061
Bank name: MKB Bank
Bank address: H-1056, Váci u. 38., Budapest, Hungary
Swift/BIC code: MKKBHUHB

Note: The transfer sheet should include the name of the student as it is written in the passport and the remark “SE HS”.

Personal checks and money orders are not accepted.

Please note that the above mentioned net amounts have to arrive at the account – the commission charges have to be paid by the student.

Important: If the tuition fee is not credited to our bank account by the above deadlines, students have to pay a default charge and may be suspended/dismissed.

Refund Policy

1. Before registration at the Faculty
   Non-refundable: Application Fee (EUR 200)
   Refundable: 100% of all other payments already made

2. After registration at the Faculty
   a.) Students are not entitled to a refund of the tuition fee if they are compelled to withdraw for academic or disciplinary reasons. Failure to meet educational requirements includes suspension, dismissal or absence from lectures and practicals for more than 25% of a subject’s number of hours per semester.
   b.) Students are entitled to a refund only on a pro rata basis if studies are interrupted due to the death of parents/guardians, certified medical problems, or due to the requirement to fulfill a military service obligations.

Refund is applicable under the following conditions:

Non-refundable:
- Instruction materials EUR 660
- Service fee EUR 660
- Application Fee EUR 200
- Registration Fee EUR 200

Refundable: Proportional costs are refundable according to the Refund Policy stated above.

No other claims are acceptable.

Other Costs

Health Insurance
A full coverage basic health insurance for Hungary is a prerequisite for registration at the university.
As a part of the tuition fee a special insurance for students is offered by the Union Insurance Co. which includes an English-language call center, GP-service and treatment at the Polyclinics and Clinics of Semmelweis University. You will find details in the letter of acceptance.

Field Practices
Students are required to have some medical examinations to be able to start Field Practices. Students need to get these certificates themselves and for most of them they also have to pay.

Housing
The Faculty is offering accommodation to the students in Residence Halls for 20,000 HUF/person/month in two-bed rooms. Only the students who have been admitted to the Faculty can apply for housing in the residence halls. The application form and the list of required documents will be e-mailed to the students. As the application process is highly competitive, it is important for students to provide all the required data and documents. Applications will be considered by the Residence Hall Committee on the basis of the applicant’s social status. Applicants will be informed about the result and move-in possibilities after 20 August.
Ask for more details about the application at kb@se-etk.hu.
Academic Policies

Students are required to know and act according to the Faculty’s Studies and Examinations Regulations. Attendance in classes and practical exercises are prescribed in the actual Subject Descriptions.

Students are expected to take examinations when scheduled, otherwise they lose their chances. The credit-system allows a certain degree of flexibility in signing up for courses and in the timing of exams.

This is conform to international standards and helps an easier setting-in of students with different educational backgrounds.

Students get more information about study matters at the Registration and in the course of “Introduction to Higher Education Studies”.

Basics of the Credit-based System

A new credit system was introduced in September, 2003 to subserve free workflow in the EU, and to promote easy career adjustment in the framework of lifelong learning.

1. A credit point is a unit of measure of average total student coursework workload needed to complete a subject. A credit is earned if the student receives at least a pass mark (or a “satisfactory” mark) for a course. The value of the credit earned is independent of the mark received for the course. No credit will be earned, if any of the policies are violated.

2. One credit is earned for every thirty hours of the student’s academic work. This academic work includes the time spent in class and the time spent on individual work by the student.

3. Credits can be earned for courses that conclude with examinations.

For Accreditation Process

In case the applicant would like to handle a Credit Transfer Request to have the earlier studies (credit points) admitted it is necessary to present the following documents:

- official Subject Descriptions
- official transcript: including all the grades and credits from the previous college/university studies
- official certification about the field practices
- marking scale in order to evaluate/compare academic records accurately
- transfer request written by the applicant
- student status certificate: only in case the applicant still studies at a college/university (not older than 30 days)

Credit Transfer Requests are assessed by the Credit Transfer Committee.

Transfer of a subject(s) is only possible if the content of the substitute and substituted subjects are overlapping.

4. Registering for and completing a further subject with point value equivalent to 10 percent of the total credit specified in the qualification requirements of the given programme is free of charge for students participating in the tuition fee paying training system, however, they must pay a fee proportion to the credit points.

5. At the end of the four years of study, students have to write a thesis and pass a final exam. These are prerequisites of a diploma.
